

USDTZED 20 Stable Coin — Whitepaper

Abstract

A short overview of USDTZED's mission as a stable, community-driven BEP-20 token designed for efficient transfers on the BNB Smart Chain.

Introduction

Explains what stablecoins are, why USDTZED exists, and how it supports fast, low-fee digital payments.

Technology (BEP-20 Standard)

Technical summary of the token's implementation on BNB Smart Chain, compatibility with popular wallets, and transparency benefits of smart contracts.

Stability Mechanism

USDTZED aims to maintain a 1 : 1 peg with the US dollar, backed by reserves held in stable assets.

Tokenomics

- Total Supply: 54,000,000,000 USDTZED
- Distribution:
 - 40% Liquidity & Exchanges
 - 30% Community & Rewards
 - 20% Development & Marketing
 - 10% Reserve
- Network: BNB Smart Chain (BEP-20)
- Contract Address: 0xcb12771D5d04f9bEa6D84b5eb77Fe1878801b29d
- Owner Address: 0x260730D111257f8B533cBec0b69fFD81C1B95f31

Roadmap

Phase 1 – Launch

Phase 2 – Growth

Phase 3 – Ecosystem

Governance & Community

Community-driven initiative led by a transparent team; governance features planned for future updates.

Security & Auditing

Smart-contract audit pending; code will be publicly reviewed for transparency.

Future Vision

Expansion into DeFi tools, staking, and cross-chain interoperability.
